Art Unit: 2111 Attachment of PTOL-37

DETAILED ACTION

Receipt Acknowledgement

1. Receipt is acknowledged of the Amendment After Final filed on 20th of November 2006.

No claim has been amended; no claim has been canceled; and no claim has been newly added since the RCE Final Office Action was mailed on 26th of September 2006. The Response after Final Rejection without changing and/or extending the scope of the claimed invention but persuasive arguments, and further consideration with a new prior art search, place the Application in condition for allowance, and thus this Response after Final Rejection is entered.

Currently, claims 4, 9, 10, and 12 are pending in this Application.

Allowable Subject Matter

2. Claims 4, 9, 10, and 12 are allowed.

20

- 3. The following is an Examiner's statement of reasons for allowance:
- 4. The Applicants' arguments in the Response to RCE Final Office Action filed on 20th of November 2006, page 2 are considered persuasive regard patentability of the invention as disclosed in the claims.

In particular, the feature of the invention for "a presence detection circuit comprising a digital signal line providing a presence signal responsive to coupling of the mobile data unit to the coupling unit; and a local controller connected to the field bus and connected to the presence detection circuit for receiving the presence signal, wherein the local controller can transmit a selection of views to the mobile data unit via the digital signal line." is not seen to be taught or suggested in the prior art applied in the final claims rejection. In updating a search of the prior art, it is noted that the claim limitations of the respective claims 4 and 12 are deemed allowable over the prior art of record as the prior art fails to teach or suggest that the local controller can transmit a selection of views to the mobile data unit via the digital signal line, wherein the digital

Art Unit: 2111 Attachment of PTOL-37

signal line being comprised in the presence detection circuit provides a presence signal responsive to coupling of the mobile data unit to the coupling unit.

Therefore, the claims 4 and 12 are forward to distinguish over the prior art of the record, respectively.

5 The claims 9 and 10 are dependent claims of the claim 4.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

10 Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Klein et al. [US 6,138,194 A] disclose apparatus for sensing movement of a bus card and automatically removing power from the bus card.

Goodrum [US 5,922,060 A] discloses expansion card insertion and removal.

Takata et al. [5,796,185 A] disclose circuit card present sense and protective power supply inhibit for airborne application of ATM switch unit.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christopher E. Lee whose telephone number is 571-272-3637. The examiner can normally be reached on 5:30am - 3:00pm (EST).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mark H. Rinehart can be reached on 571-272-3632. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
